DETAILED ACTION

Allowable Subject Matter

1. **Claims 1-70** are allowed.

The following is an examiner's statement of reasons for allowance:

2. **Claims 1-70** are allowable over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior art references which teaches the combination of attributes taken from selection diversity transmit power control (SSDT) and transmit diversity. In particular, the prior art teaches SSDT as shown in applicant's figure 7 (also see applicant's Background and Section 5.2.4.1 of 3GPP RAN S1.14 V0.0.1 included in applicant's provisional application 60/121,789 filed 2/26/1999). The features/limitations of SSDT are recited in the claims to include "selecting one of the remote transmitters" (see e.g., claim 1) and "not transmitting at least one signal from at least another transmitter in response to the step of receiving" (e.g., see claim 9). Absent from applicant's figure 7 is transmit diversity occurring at base stations/transmitters which is taken into account by applicant as further presented e.g., in applicant's figure 6, see e.g., first full paragraph at applicant's page 3. The features/limitations of transmit diversity are recited in the claims to include "determining which of the plurality of remote transmitters use transmit diversity" (e.g., see claim 1) and "in response to transmit diversity" (e.g., see claim 9). It is at least the combination of the above-mentioned attributes/limitations that are not cited in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
